

Lenovo Server Services and Support

Top Gun Technology provides Mission Critical Support ServicesSM to Fortune 1000 companies by leveraging its OverWatchSM framework that digitally connects technology, service operations, engineering and global logistics. Within this framework, Top Gun's TPM 2.0SM program delivers agile maintenance and support solutions explicitly designed for complex hybrid-compute and storage environments. Top Gun Technology is recognized as an engineering-led firm that clients trust to support their most critical technologies spanning the data center to the network's edge. **Proven, Trusted and ReliableSM**.

TPM 2.0 support optimizes performance and availability of your Lenovo data management infrastructure. By leveraging predictive analysis, technology and best practices, your L3 Lenovo server engineers prevent and solve problems before they become a disruption to business. Top Gun's Lenovo Server Solutions Portfolio offers a comprehensive range of technical support options, consulting services and cost-effective hardware solutions.

Products Supported

- *ThinkServer Rack (RDxxx), Tower (TDxxx) and Rack Storage*
