TOP GUN TECHNOLOGY

IT Asset Disposition (ITAD) Services

Modernization of data center environments requires forward-thinking strategies focused on agility, security, resiliency and cost containment. In the wake of progressive build-outs, decommissioning assets and secure disposition can require less attention when committed to a multi-dimensional IT solutions partner. Top Gun Technology provides a suite of data center infrastructure services, including IT Asset Disposition, with an emphasis on servers, data storage and networking hardware. Top Gun Technology is renowned as an L3-engineering-led provider of Mission Critical Support Services® to Fortune 1000 clients. **Proven, Trusted and Reliable**℠.

Top Gun's ITAD Solutions Portfolio covers secure onsite/offsite wiping or destruction, secure transport, asset recovery and maximized recycling potential. Senior-level project managers are accountable for every phase of secure take-outs, while onsite activities are led by certified Top Gun engineers and technicians, expert at the proper handling of servers, data storage and network hardware.

Maximized Recycling, Re-Purposing & Increasing Value Recovery

As a 20+-year provider of hardware maintenance, extracted parts often possess market value for Top Gun or its global network of supply partners that ultimately sets the highest economic value recovery.

Commitment to Sustainability

Simultaneous focus on re-use and/or re-sale, Top Gun's multi-phased approach to value discovery promotes corporate environmental sustainability and security initiatives.

ITAD Service Highlights

- Global network of 1,100 Top Gun Certified field engineers and technicians

- Managed Deployment: Designed to handle all key aspects of deployments with decommissions

- Asset Recovery: Methodologies ensure retained asset value following data sanitization and any needed refurbishment

- Secure Erasure: Follows DoD 5220.22-M Wiping Standard

- Destruction: Any security standards, preferences and methods are possible

- Recycling: R2-compliant recycling ensures the least possible volume of environmentally-compliant component disposition

- Optional assistance with any related installs, moves, additions or changes (IMAC)

Focused on Value Creation

- Maximized ROI/TCO for your physical assets and disposition investments

- Security assurance through meticulously vetted R2 and ISO-certified technicians delivering within a highly disciplined and tracked delivery program

- Simplify vendor and contract management with one vendor, capable of multiple service needs

- Gain control over security risks associated with any data center transition

- Reallocate funds and resources to higher-value initiatives

- Providing an ethical and sustainable service consistent with the circular economy

- Succeed with a veteran-owned, financially independent company, capable of global delivery

ITAD Service Features & Delivery Focus
